

Applied First Aid and other Emergency Care Training Courses

Background:

From 1 November 2014 the Australian Lifesaving Academy Queensland facilitates Emergency Care Training to all club members. This initiative takes pressure off the current club trainers, who will now specialise in delivering operational courses such as bronze, SRC, IRB, ATV and tractor.

We will still hold some of the Emergency Care Training at Dicky Beach SLSC and recently have incorporated first aid into a bronze course.

Courses available will include:

Resuscitation HLTAID001

First Aid HLTAID003

Advanced Resuscitation Techniques Certificate HLTAID007

Pain Management PUAEME005A

Available Courses:

SLSQ have provided a link to their website that lists the upcoming training courses in the Sunshine Coast and Gold Coast available to our members to attend at no cost.

Go to the following link to view the course calendar.
